

PROMPT RAD PROCEDURE

Website: login.promptrad.com

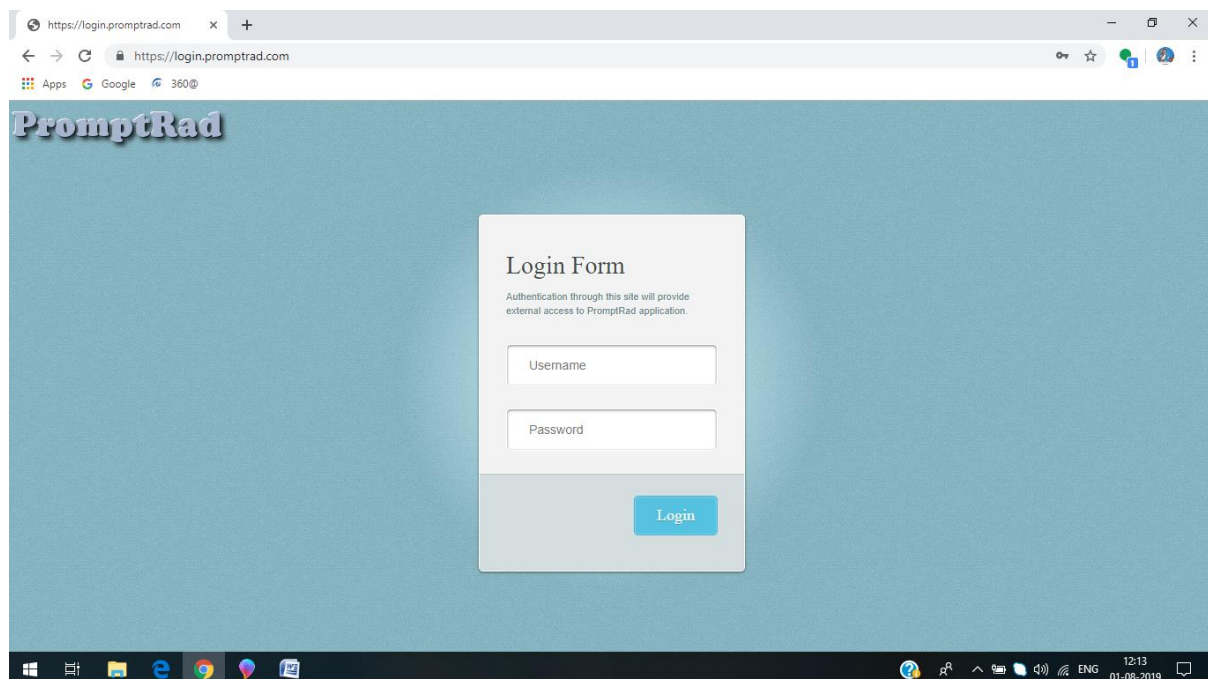

user id: naiyerimam@gmail.com

pass: 1DrNlm@m

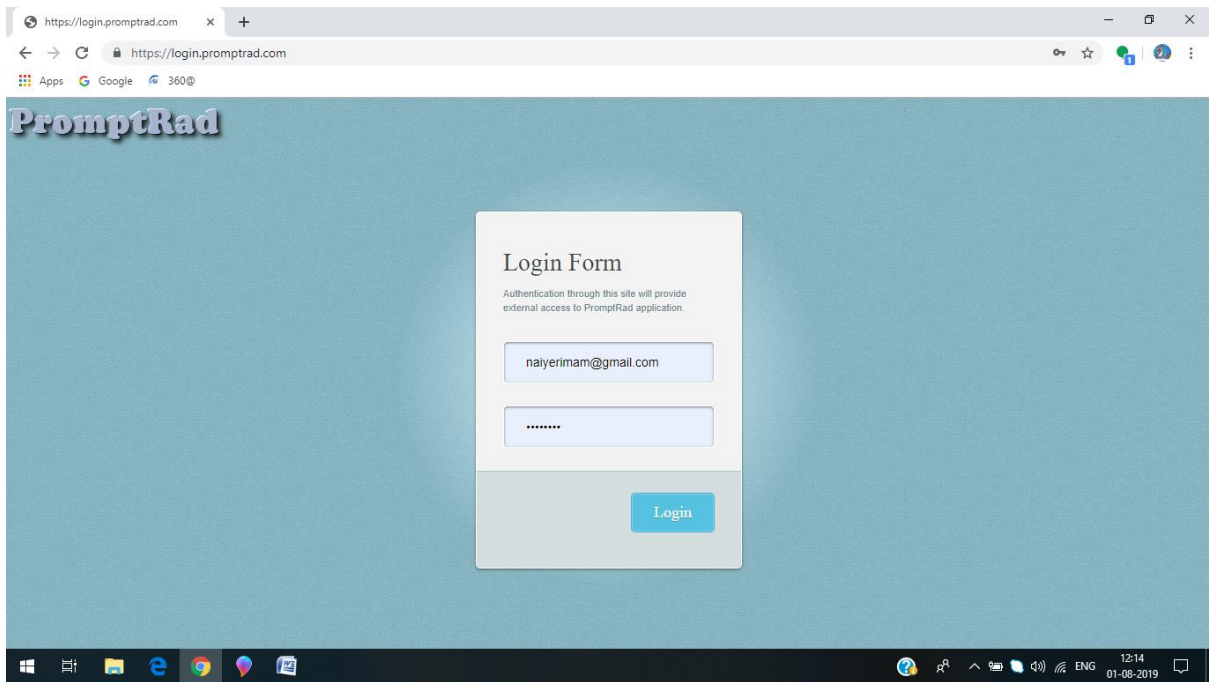

Note: We can open this promptrad on Google chrome.

- ❖ Prior will not get opened on a same system.
- ❖ Prior should open on a separate system only (just like stat portable).
- ❖ Note: Prior should open on a separate system. Once we open a promptrad case, we have to check for prior first (previous findings button). If prior is there, we should open current case on one system and prior on another system.

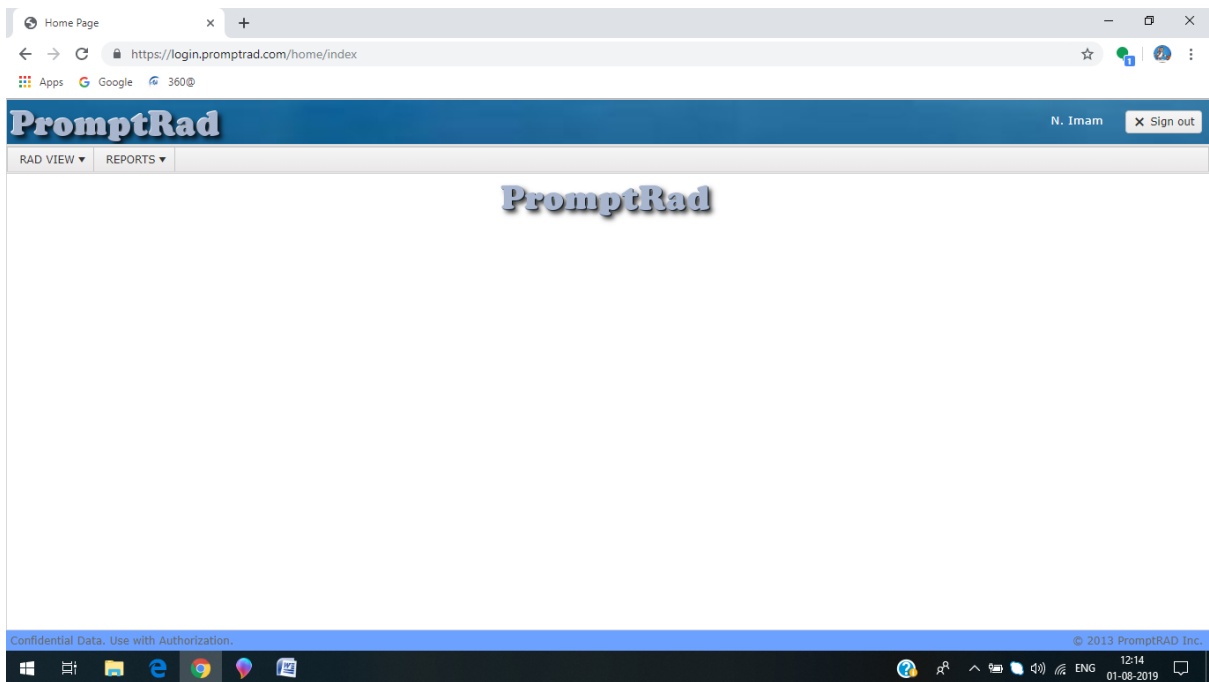

First open the promptrad website on Google chrome.

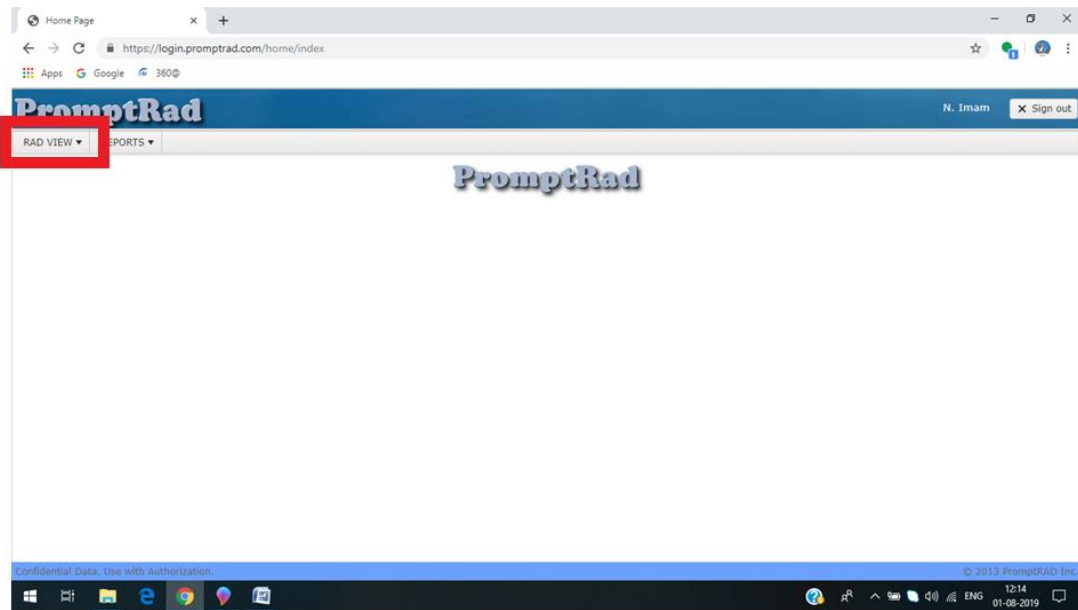

Login with appropriate username and password.

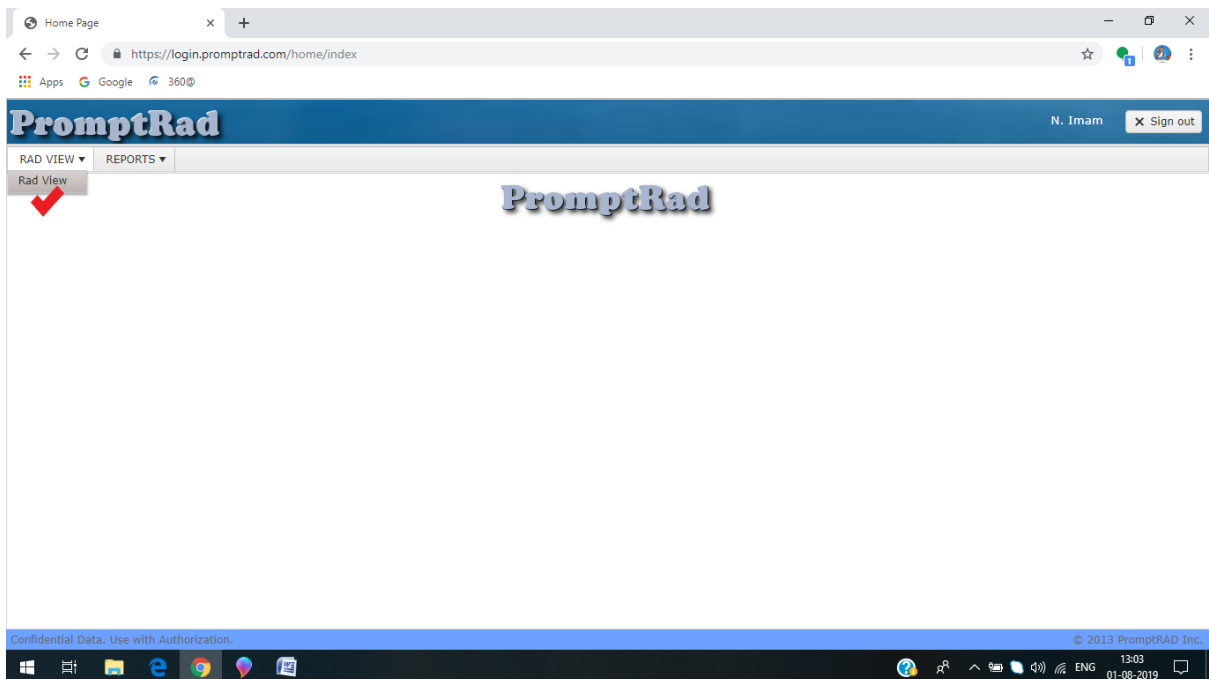

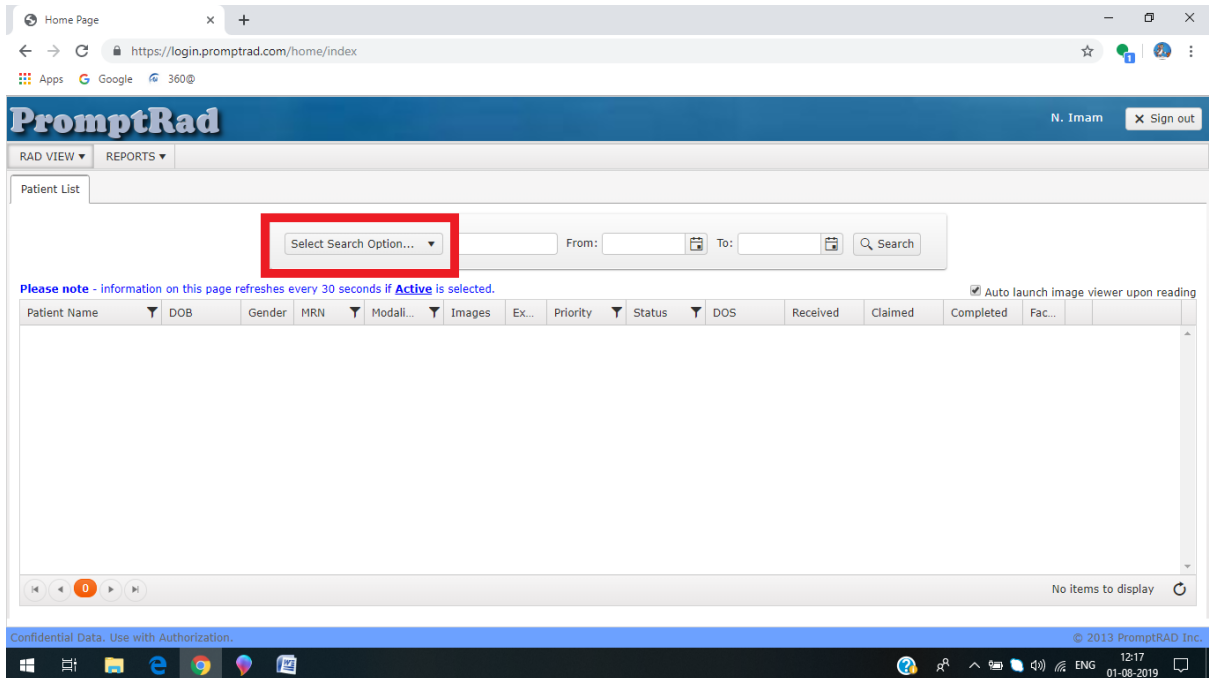

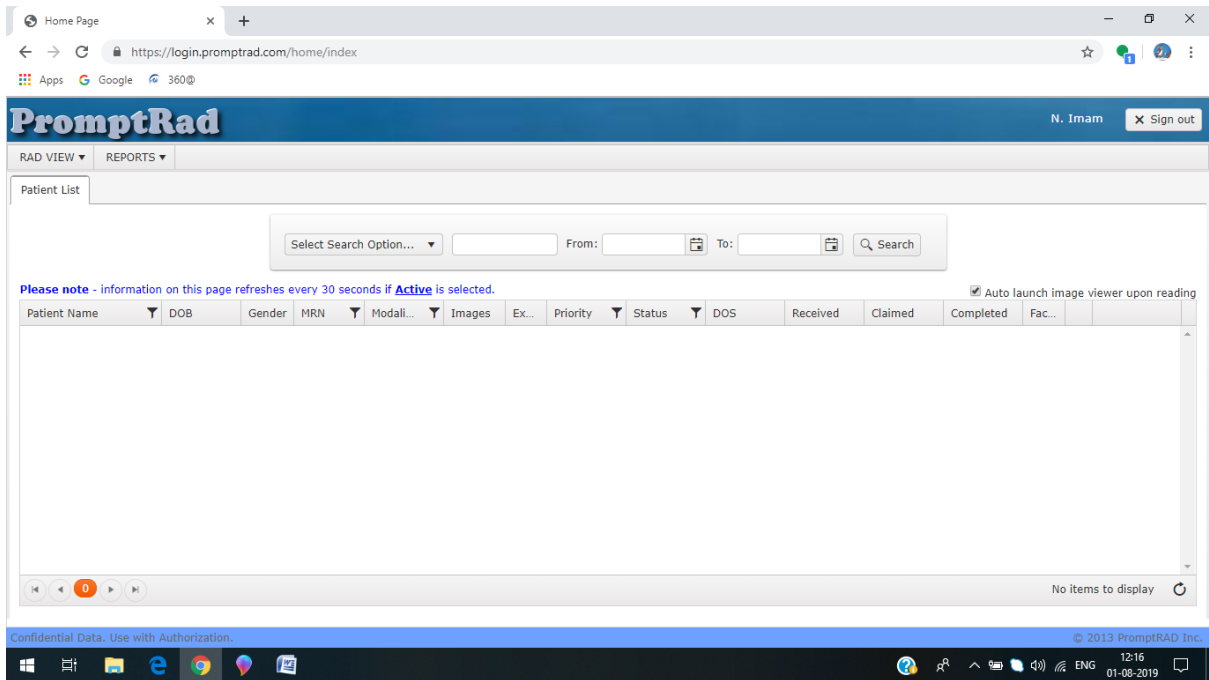

Then click on **Login**.

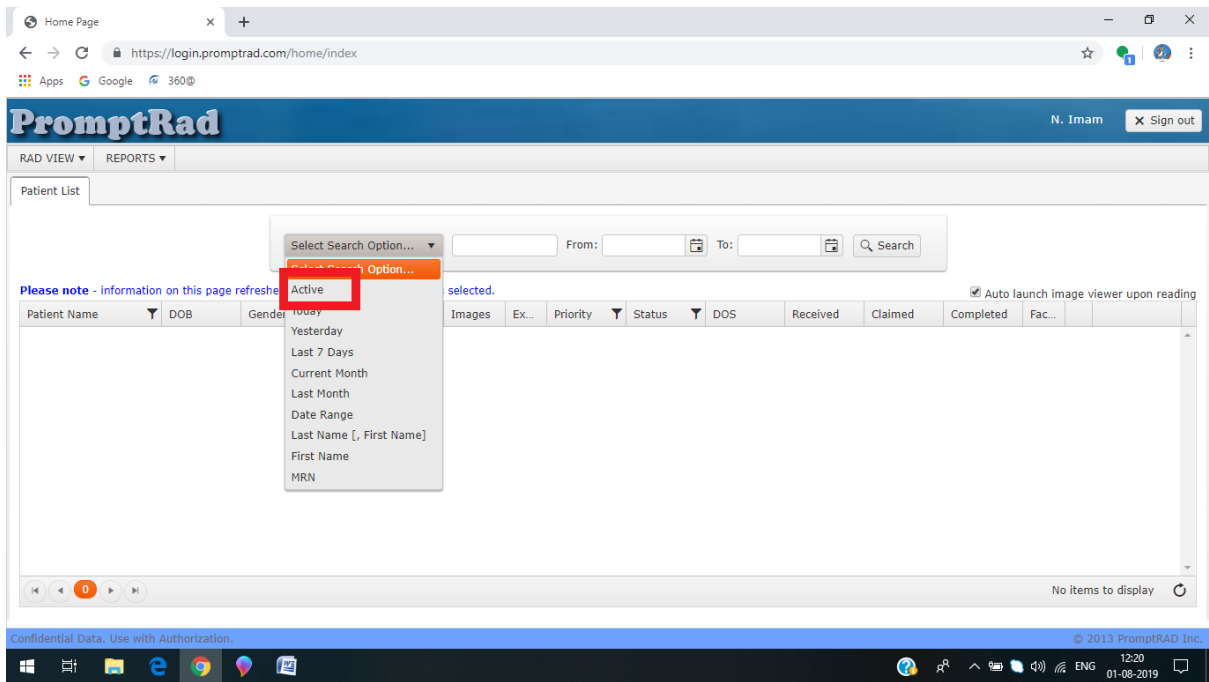

Next click on **Rad view** button on top. Select again **Rad view** option there.

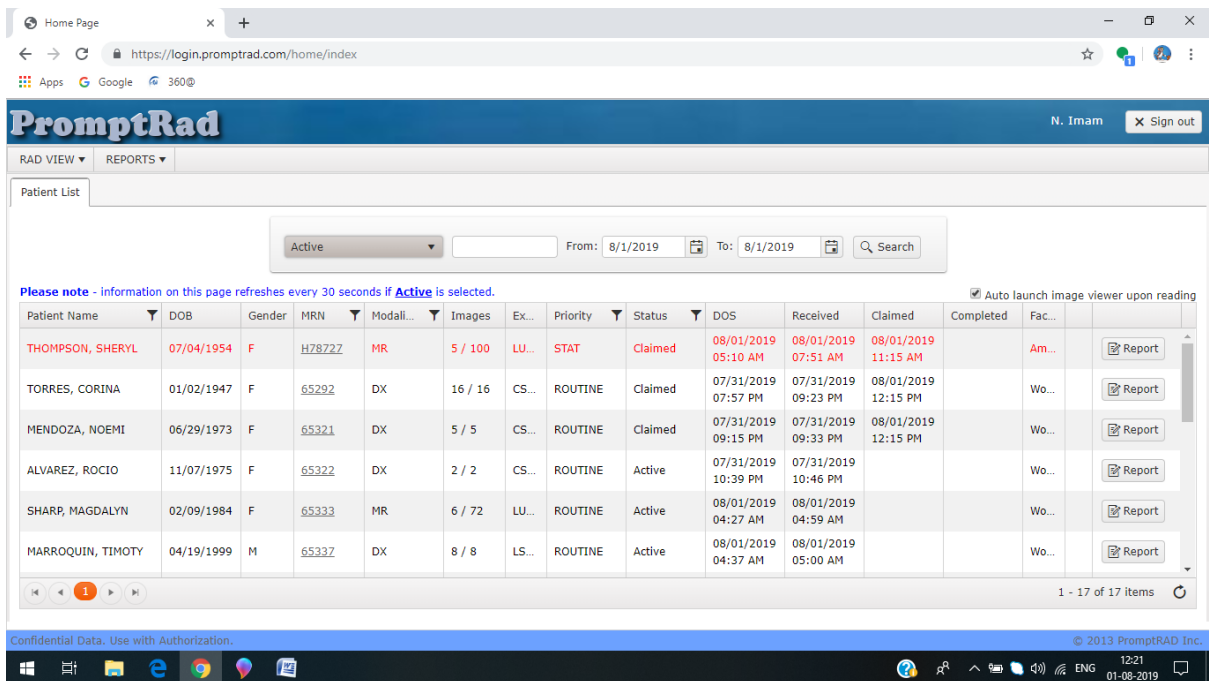

Select "Select search option" option. Then again select **Active** option there.

Prompt rad worklist

To refresh, click on **search** button on right side.

Study count : we have to change study count accordingly, depends on the multiple cases.

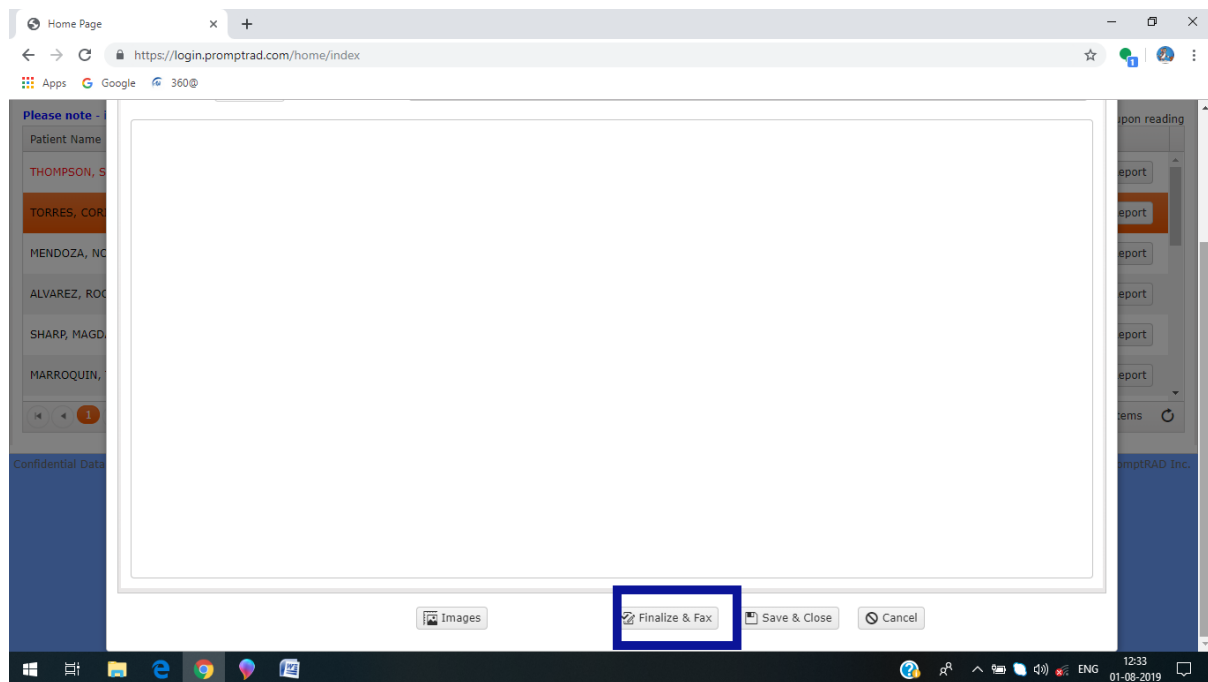

If we have 3 studies, then study count will be 3.

If we have only one study, then study count will be 1.

After opening the report – Follow the 7 steps.

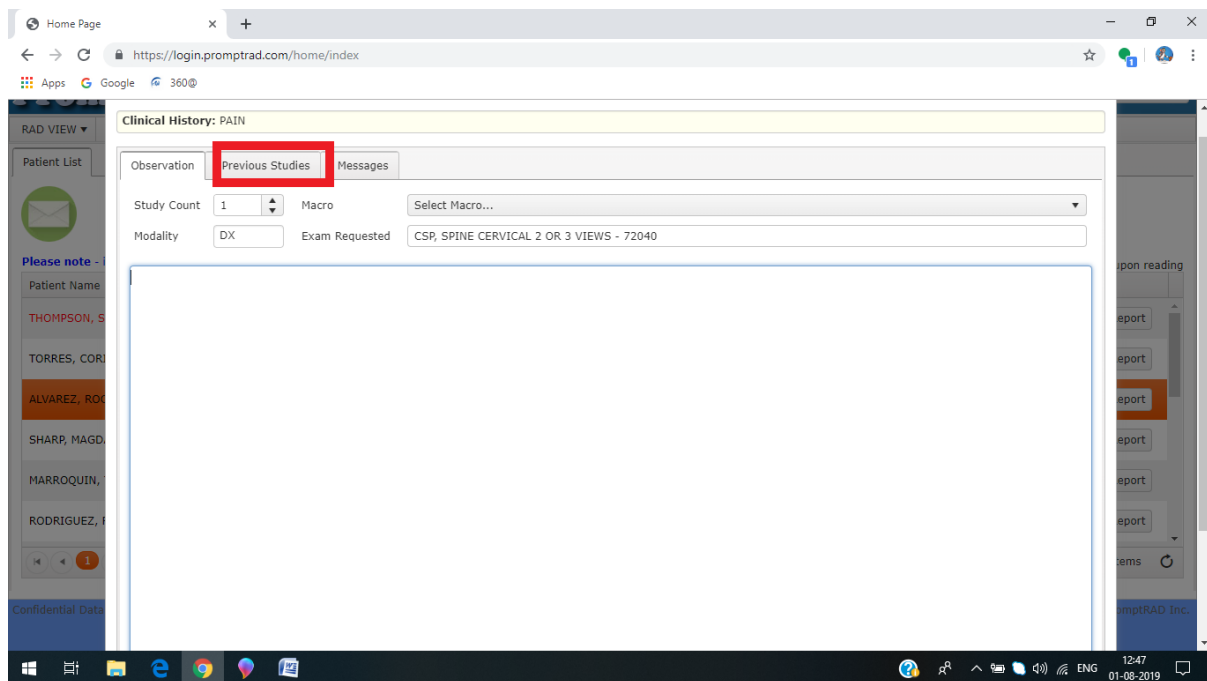

Please check for History, number of views, number of studies, DOB.

(Comparison should open on a separate system only. Once promptrad case is opened, check for prior (previous findings button) and do accordingly).

To sign off, click on the Finalize and fax.

To check for prior, click on that “previous studies” button.

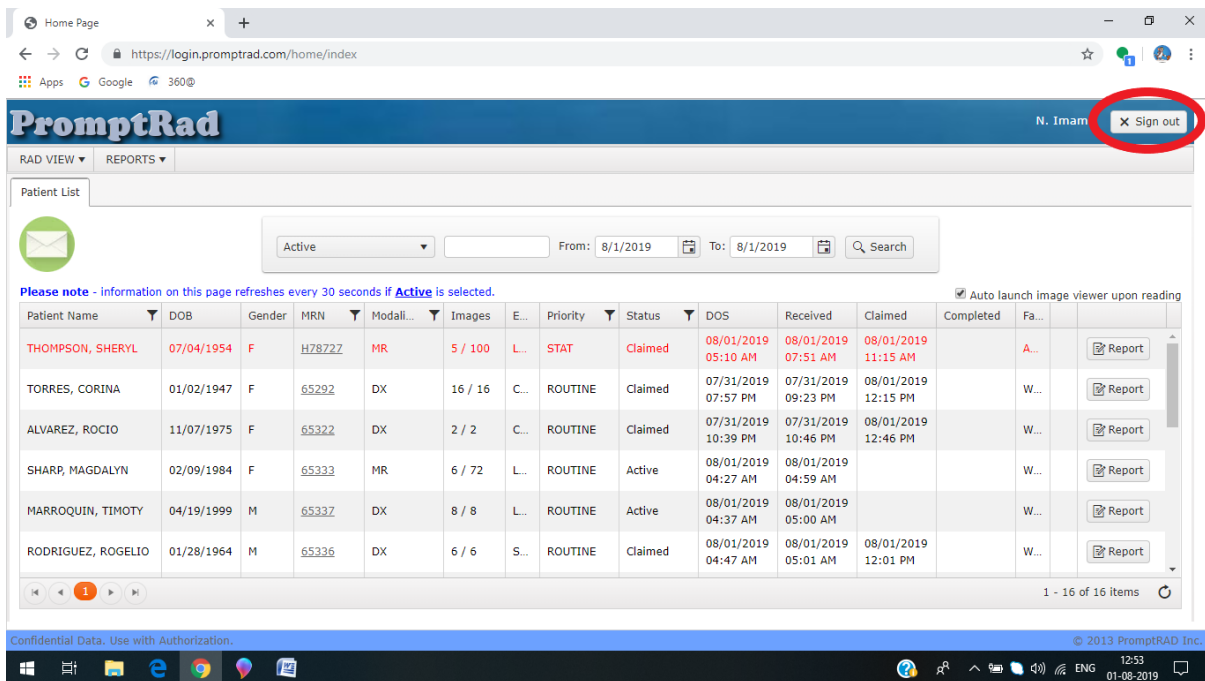

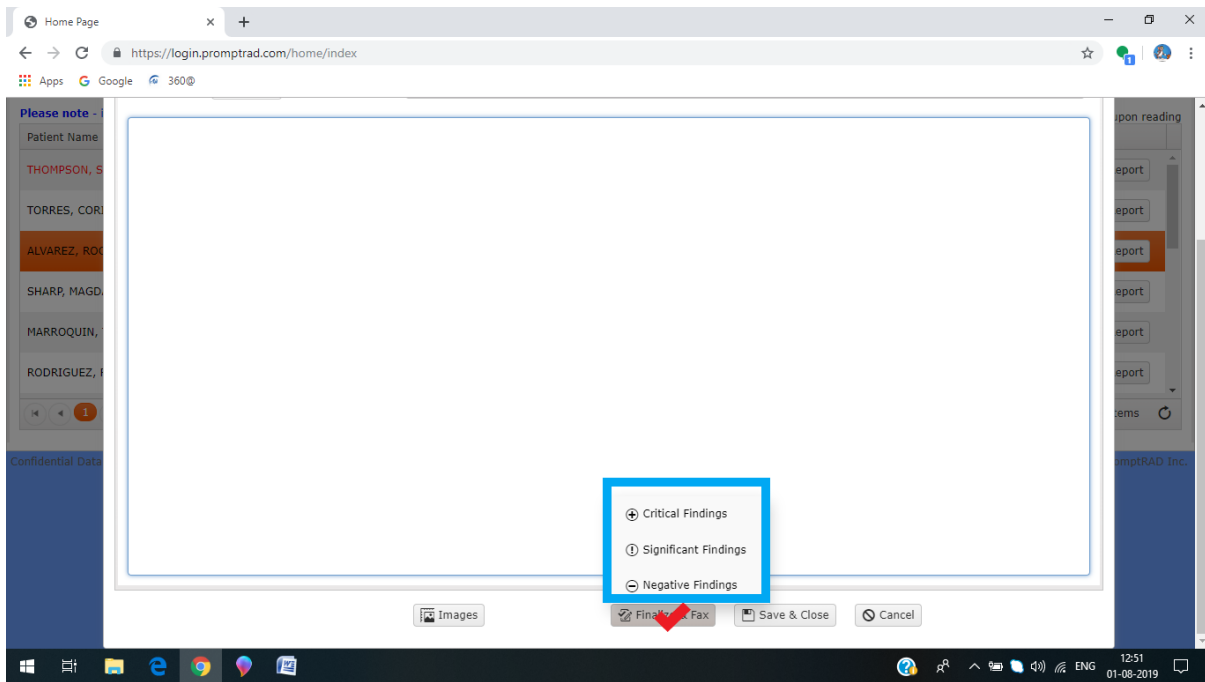

If any prior is there, click on the “report” option to open prior.

Prior images and report get opened and do accordingly.

- ❖ Prior should open on a separate system. Once we open a prompt rad case, we have to check for prior first (previous findings button). If prior is there, we should open current case on one system and prior on another system.

THOMPSON, S.

HENDOZA, N.

ALVAREZ, R.

SHARP, MAGD.

MARROQUIN, J.

RODRIGUEZ, J.

Confidential Data

Technique: Right Shoulder, 3 views

Comparison: None.

Findings: There is no radiographic evidence of acute fracture or dislocation. The humeral head and neck as well as clavicle and scapula are intact. Visualized lung parenchyma is clear. The bony mineralization is mildly decreased. Mild narrowing of gleno-humeral joint space and AC joints.

Impression:

1. No definite radiographic evidence of acute fracture or dislocation.
2. If there are persistent symptoms, follow up exam may be obtained as clinically warranted.
3. Mild osteopenia.
4. Mild degree of osteoarthritis.

Technique: Cervical spine, 2 views

Comparison: None.

Findings: There is straightening of cervical lordosis, which may be positional or due to muscle spasm. There are no compression deformities. The bony mineralization is normal. Prevertebral soft tissues are normal. Moderate narrowing of intervertebral disc spaces with spurting most prominently at C5-6 and C6-7.

Impression:

1. Mild straightening of the cervical lordosis, which may be positional.
2. No compression deformities.

The screenshot displays the PromptRad web application interface. At the top, the browser window shows the URL `https://login.promptrad.com/home/index`. The application header features the "PromptRad" logo on the left and the user name "N. Imam" on the right, next to a "Sign out" button which is circled in red. Below the header, there are two main navigation tabs: "RAD VIEW" and "REPORTS". Under the "Patient List" section, a search filter is set to "Active", and a date range selector shows "From: 8/1/2019 To: 8/1/2019". A note indicates that the information refreshes every 30 seconds if "Active" is selected. The main area contains a table of patient records with columns for Patient Name, DOB, Gender, MRN, Modality, Images, Status, Priority, DOS, Received, Claimed, Completed, and Fa... Each row includes a "Report" button. The bottom status bar shows "1 - 16 of 16 items".
